EXPERIENCE

November 2025 – May 2026
Junior Developer, VestRoll

This was a fiat trading platform, and I was assigned to work on the financial segment, settings, and also on the onboarding pages. At the completion of each segment, the work is confirmed to be good before being pushed to GitHub.

November 2024 – June 2025
Intern, Zuumatek

Worked on a pharmacy project. I was asked to make a complete makeover for the homepage. The website has different users such as Cashier, salesperson, accountant etc. and I changed the different users' pages and made them all mobile responsive.

May2024 – August 2024
Intern, Zidio software company

This was a 3-month internship with an India based company. The interns were divided into teams of 4 people or more. My team and I were able to create 2 websites which are a feedback collection website and a chat app with socketIO. We did these using the MERN (MongoDB, Express, Reactjs, Nodejs) stack.

January 2023- December
Intern, Keble Ltd

This was a a learning phase under the guidance of Keble CTO. This was during my compulsory One-year service for my country. During this period, I advanced my knowledge of skills such as Reactjs, Javascript, Nodejs etc. I also created websites showing how far I've learnt.

July 2019 – December 2019
Intern, Arctic Spatial Limited

This was a 6-month Compulsory student industrial working experience service for students runing a 5-

year program. I was able to learn how car tracking works and worked on digitizing an image for a construction company using ArcMap. A training was also conducted for all staff on mapInfo

EDUCATION

October 2015 – October 2021
